The University of Nairobi is committed to increasing access to quality education and diversifying its delivery mode using open, distance and e-learning modes. The modes of delivery include specifically prepared self instructional print and e-learning materials in form of CDs and online materials delivered through the e-learning platform of the university and audio-visual materials.

Through collaboration with the various schools in the University we have developed e-content materials for diversifying, enriching and increasing access to quality university education through e-learning modes.

The courses are offered by internal Schools, Faculties and Institutes in collaboration with the Centres for Open and Distance Learning and e-Learning.

Learners support services are provided for orientation, introduction, tuition and revision by electronic communication devices at the University of Nairobi e-learning platform and limited face to face by competent staff.

These strategies deliver courses to learners anywhere in Kenya and beyond, at their own pace and at any time anywhere.

There are **52** undergraduate degree programmes and **22** postgraduate degree programmes fully or partially offered by open, distance and Learning using print and e-learning resources distributed under respective Schools and Faculties
